Experience

Staff Software Developer @ ServiceNow
servicenow.com

10/2018—Current

» Designed and implemented a one-button white label mobile app build and delivery process, working with teams throughout organization

» Created automated unit tests, trained team on testing, and helped integrate automated test runs into development process

» Drove architecture improvements that eased testing, increased reuse, reduced debug effort, and improved app performance

» Resolved iOS accessibility deficits with reusable, flexible tools

» Championed Swift style guide and implemented automated linting

» Trained team on topics like clean architecture, testing, UX, UIKit, and Swift

Lead Mobile Developer @ Amco
amco.me

9/2012—9/2018

» Leading team of iOS and Android developers creating apps for use in classrooms and homes around the world

» Apps are offline-first, optimistically sync, share codebases

» Responsible for rapid prototypes, architecture oversight of mature codebases, providing complex tools for integration

» Created automated build, test, and QA delivery system

» Key figure in business trust of engineering department

» Scaled up development team, instilling and preserving culture

Principal Software Developer @ Bridgepoint Education
bridgepointeducation.com

4/2006—9/2012

» Involved in full web development stack: database design, middle tier software, front end applications, UI, and UX

» Particular focus on large-scale JavaScript applications with cross-platform syncing used by multiple universities for students, faculty, and administrators

» Responsible for first mobile apps from concept to creation

» Championed web and iOS testing culture

» Lead front end team through development lifecycle changes

» Mentored junior developers and non-technical teammates

Developer @ Lifesquare
lifesquare.com

2012—2014 Freelance

» Built web and iOS apps for consumers and medical professionals

» Focused on speed and ease of use on all platforms

» Helped design API used internally and externally

» Collaborated closely with entire team for quick iterations

» Primarily remote work with occasional onsite days
